Remote Access

Want to access your fund-raising data from offsite locations?

Increasingly, nonprofit organizations have the need for widespread, yet secure, access to constituent data. We at Metafile can offer help regarding how to choose the best option for your organization.

results*plus!* works with industry standard platforms that enable remote access to network data. Our clients can access their results*plus!* data remotely using the following methods:

- Microsoft® Terminal Services
- CITRIX Metaframe®
- Thin Client
- Browser Plug-ins
- VPN (Virtual Private Network)

System Administrators / IT Staff: Please contact Metafile with any questions about enabling remote access to your organization's results*plus!* fund-raising data.
